DIY Costume

Have children choose an animals that they think could have or would have liked to have raise them. Use the space below to keep a record of which animal each child chose. Children can use a paper plate to create a face mask for that character or you could print one for them to colour from our costumes section (learnfromplay.au/diy-costumes). Once printed children can pretend to be that character and their classmates can try to guess which animal they are pretending to be.

Child	Animal Costume

Uses the creative arts to express ideas and make meaning.
