

Glossary Definitions

Match each word from the glossary to its definition.

Camouflaged ●

● When an animal uses its natural colour or shape to hide by blending in with its surroundings.

Captive breeding ●

● Having enough variety in the genes within a population to make sure more individuals can adapt and survive in new environments.

Conservation ●

● The plants growing in a particular area or habitat.

Evolutionary distinctness ●

● A measure of how isolated a species is in its evolutionary tree, which shows how many ancestors it has in common with other species.

Genetically diverse ●

● Keeping eggs at the right temperature so that they can develop and hatch.

Incubating ●

● The protection of all things found in nature.

Scrape ●

● Breeding threatened and endangered species of animals in a safe place, such as a zoo.

Vegetation ●

● A shallow hole in the soil used by ground birds as a nest.
