

BUSH X CHART

Iggy and Grandad take a walk in the bush. They see wildlife, hear a sulphur-crested cockatoo, a magpie, a kookaburra and noisy miner birds. They see new shoots on trees after the bush fire and are frightened by a wallaby. They crush the leaves and smell the eucalyptus and feel the scribbly marks of caterpillars on the gum trees.

Take a walk in the bush and complete the X chart below of how it sounds, looks, smells and feels in the bush.
