

ASTRONOMERS

There have been many astronomers who have contributed to the current knowledge of our universe. The find-a-word below includes 25 of the most famous of these. You may like to choose one and research when they lived, what they discovered and how that changes the understanding people previously had of the universe. See if you can identify the 5 scientists who are women.

Azophi	Copernicus	Halley	Huygens	Newton
Brahe	Drake	Hartmann	Kepler	Ptolemy
Burnell	Einstein	Hawkings	Leavitt	Sagan
Cannon	Eratosthenes	Herschel	Messier	Shapley
Cassini	Galilei	Hubble	Mitchell	Tombaugh
