

# INTERNET TROLL

## ANSWER KEY

An internet troll is someone who makes trouble on the internet. They might write mean or untrue things on websites, forums, or social media to make people upset or to trick them. Trolls enjoy getting a reaction from others, and they often hide behind their computer screens, using the anonymity of the internet to say things they might not say in person.

If you ever find yourself being bothered by a troll online, it's important to know what to do. First, remember not to answer their mean messages; responding can make things worse. Instead, tell a trusted adult about what's happening. They can help you report the troll to the website or app where it happened, so the troll can be stopped from bothering you or others. It's important to keep your personal information private online to stay safe.

### 1. What is an internet troll?

An internet troll is someone who posts upsetting or off-topic messages online to cause trouble or get attention.

### 2. Why do trolls post messages online?

Trolls post messages to upset people or to start arguments, often enjoying the reaction they get.

### 3. What should you do if you are trolled online?

If you are trolled online, do not respond to the messages and tell a trusted adult who can help report the troll.

### 4. Why is it important to keep your personal information private online?

It is important to keep your personal information private online to stay safe from trolls and other dangers.
