

# Draw a turtle

Let's start with the head!

1

With a pencil, draw a circle for the head and small circles for cheeks.

2

Make a crescent on the center for the nose and draw on his eyes.

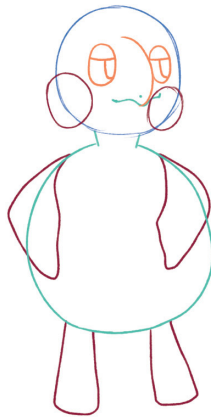

3

Give the turtle a smile and some lines for his neck.

4

Next, draw a circle for the turtle's belly.

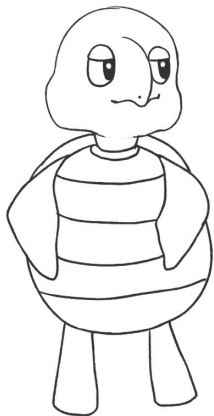

5

Draw rounded triangles for his flippers and rectangles for legs.

6

Add the details like shell marks and the back part of the shell.

7

With a pen, trace your sketch and erase the overlapping lines you don't need.

8

Add your own flair and give the turtle some colour!
