

BIRD DRAWING

Through the story illustrator Michelle Pereira uses Zim's extended name to draw a bird. Use the steps below to draw a bird and decorate it like in the back of the book.

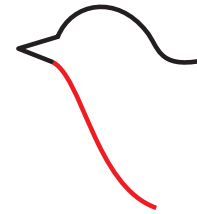

1

Draw the head with an S-like line connecting to the nape.

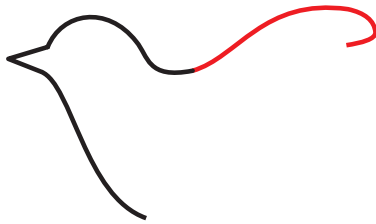

2

Draw the beak with a triangle shape.

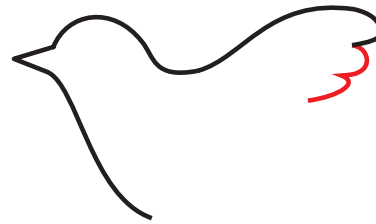

3

Move down with a slightly curvy line for the neck connecting to the belly.

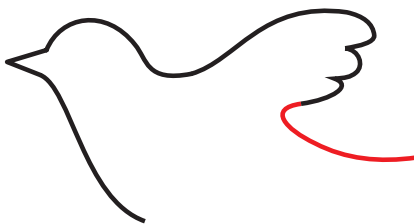

4

From the nape, draw the wings curving at the end for the feathers.

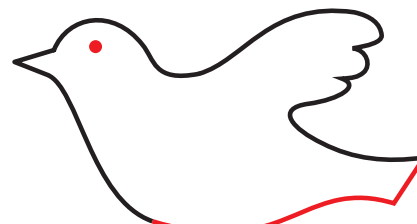

5

Add more feathers by adding more curved lines going down.

6

Starting from the lower wing, draw a curved line connecting to the tail.

7

Now finish your bird by connecting from the belly to the tail and add the eye.

Now decorate your bird just like in the back of the book.
