

TREE ELEPHANT

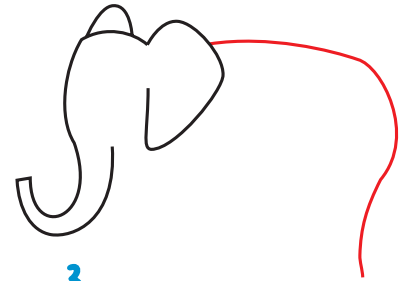

Use the steps below to draw an elephant. Once you have mastered this try replacing the legs for tree trunks and make it look more like a tree like Freya Blackwood did.

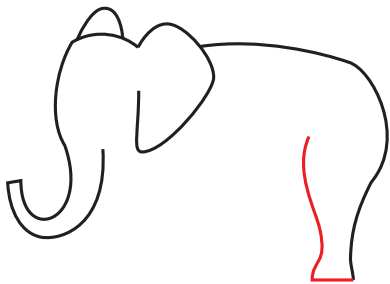

1
Draw the head and the trunk.

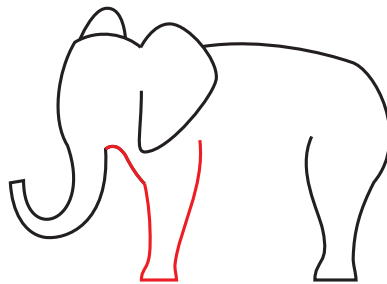

2
Next, the elephant ears.

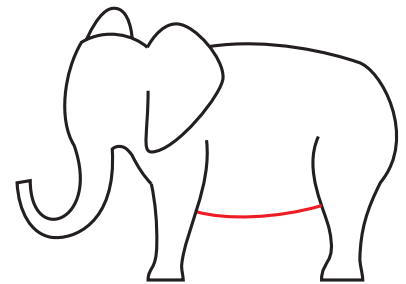

3
Draw a line for the back up to the hind leg.

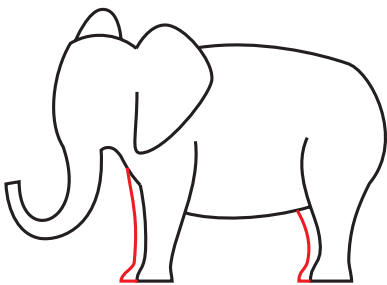

4
Then draw the hind leg.

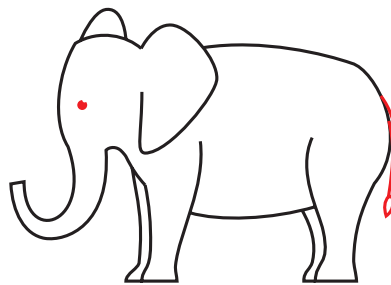

5
Draw the front leg connecting from the head.

6
Add the elephant's belly.

7
Add the other side of the legs.

8
And finally draw the tail and add an eye.
