

# Make a paper planter pot!

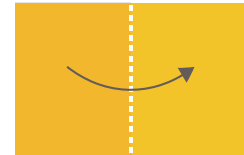

1

Turn the newspaper so the long side is facing you. Fold in half.

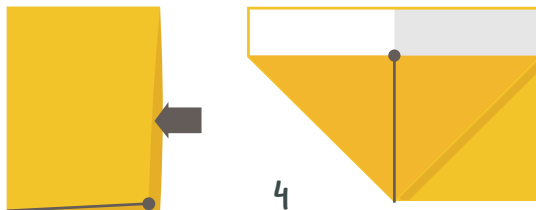

2

Fold again into a quarter size.

3

Fold it in half again.

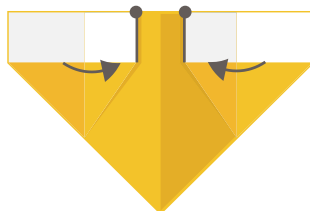

4

Now fold the bottom right corner up to the middle along the spine.

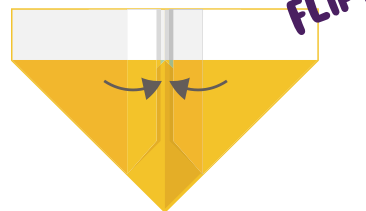

5

Flip it over on the other side and do the same thing you just did in step four.

6

Fold the wings in to the crease in the center.

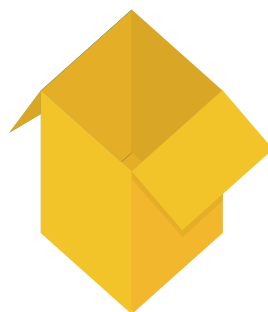

7

Fold them in again. Flip it and repeat steps six and seven.

8

Fold the top flaps down.

Now you can open up your pot!  
Make sure to square the bottom so it can sit well.
