# Circles

For this activity you will need:

String or Wool
Scissors
Glue

- For each circle cut 4 pieces of string the same length as the diameter.
- Record this length in cms in the table below.
- Paste 3 full pieces around the circumference of the circle and cut the final piece to the exact length required to complete the circle.
- Record this length in the table below too.

Item	Diameter	Circumference	Is the circumference 3 1/7 times the diameter?

ACMMG197 – Mathematics – Investigate the relationship between features of circles such as circumference and area.
