By: David Elliott

IN THE PAST

A simile poem compares 2 things using as, like or than in the comparison.
Use the example below to write your own megalodon poem.

Scientist think it died more than 2.5 million years ago
But exactly when they do not know

A fish as big as a delivery truck
The megalodon was more like a giant shark

Its teeth were larger than both your hands
And it lived in the ocean's deep lowlands

It ate big sea life such as turtles and seals
Fish as big as whales made up its meals

I am pleased it is not still in the seas today
So I can snorkel without feeling like prey
