# WHALE ORIGAMI

Follow the instruction to make an origami whale.
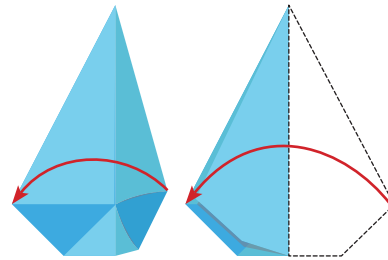

Use a square piece of paper.

Fold it by half to create a crease in the middle then open.

Fold both vertices from the left and right to meet at the middle crease.

Fold the other vertex to the center until it meets the other vertices.

Fold the paper in half.

Fold the tail from both sides to create a crease then return to original position.

Open your whale. While facing the folded part, fold the tail backward while following the crease. Draw eyes from both sides to finalise your whale.
