

Needle Felted Bee

Use the step-by-step instructions below to make a needle felted bee.

1

With the yellow wool make a small roll for the bee's body. Punch it through with a felting needle until it is felted

2

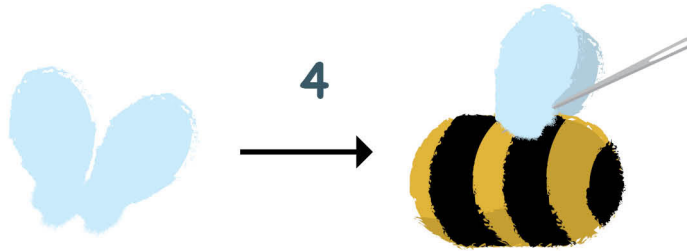

With a small amount of black wool, make a circle at the bottom of the bee. Punch it through with a felting needle until it is felted.

3

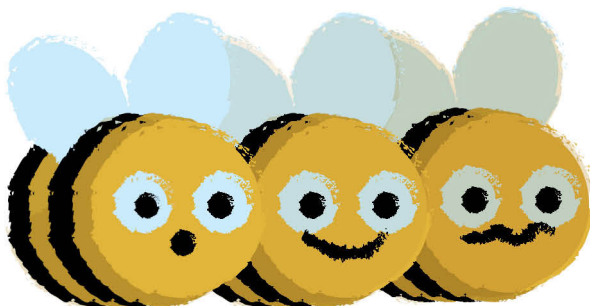

Take a thin piece of black wool and wrap it around the bee's body to make the stripes. Punch it all the way around.

4

With some white wool, create two flat wings. Leave some loose wool at the bottom of the wings so you can attach them to the body. Then attach the wings to the desired position by punching the wool into the body.

5

Take two pieces of white wool and then 2 tiny pieces of black wool for the eyes. Finish off your bee with silly expressions with small pieces of wool for the mouth.
